

# How to Register for Anywhere Access Internet Banking

The Internet Banking login box is at the upper right of the home page of our website, *www.nmefcu.org*

To see a Demo of Internet Banking: Click the “Demo” link.

Once you have completed the Demo, follow these steps to enroll in Internet Banking:

- In the “Member Number” box, enter your New Mexico Educators Federal Credit Union member number. Do not use the number of your checking account, which is slightly different. If you don’t know your Member Number, call our Anywhere Advisors for assistance: 889-7755 (800-347-2838 from outside the Albuquerque area).
- In the “Password” box, enter your Access 24 Personal Identification Number (PIN). If you do not have an Access 24 PIN, call our Anywhere Advisors for assistance: 889-7755 (800-347-2838 from outside the Albuquerque area).
- Once you have registered for Internet Banking, the system will prompt you to change your password for additional security.
- During your first Internet Banking session, you will be prompted to register for Multifactor Authentication (see information on reverse side).

Once you are fully registered, you can begin using Internet Banking to verify the status of your checking, savings and loan accounts. You can pay bills online, use FinanceWorks to manage your finances, and much more.

*The Power of WE.®*

# Enhanced Login Security

Our Multifactor Authentication feature further increases the security of your online transactions. Please follow these steps when you first log into Anywhere Access Internet Banking.

**Step 1:** In order for you to be recognized as the true “owner” of your accounts within our home banking system, you will be required to enroll yourself as a member. Therefore, the first time you visit Anywhere Access, you will be prompted to choose and answer three challenge questions.

**PLEASE NOTE:** The answers to the three challenge questions must be remembered by all joint owners of your membership. Challenge questions cannot be individualized to the person logging in.

**Step 2:** To complete the Multifactor Authentication process, you will be prompted to enroll the computer you regularly use to do Internet Banking.

- Click the button for “Yes, I want to turn on Enhanced Login Security” if you are logging in from your home or personal office computer. Once selected, click the “Add It Now” button. (Do not choose this option if you are logging in from a public computer such as a library, Internet café, etc.)
- A confirmation screen will appear confirming your choice. Click on the “OK” button to continue.
- A success screen will appear and you may now click “Continue” to begin your Internet Banking session.

Once Step 2 is complete, you will be fully enrolled in our Multifactor Authentication system. You will benefit from this online security feature that helps protect you from fraud and identity theft.
